

BLOCKMESH SUMMARY OF WHITE PAPER

Connect the world through free data sending, allowing individuals to transact at a fraction of the cost. Assist developing Africa to be connected.

PROBLEM / NEED

There are over 2.6 billion mobile phone users globally as of 2015. Access/Speed of communication equals :

- Efficient markets for more and better business
- Democratized access to information
- There are currently high data costs for mobile communication and data.

SOLUTION

Mesh communication network:

- A mobile application for smart phones
- Each device connected to the app acts as a communication relay
- E.g.: A text message is sent from A to B who are in different locations. The message is sent by A is relayed via users, from user C to user D, until it reaches B.

POTENTIAL CUSTOMER BASE

- Number of users 2.6 Billion
2015 Pew Research.

TOKEN STRUCTURE

- ERC 20
- 2 Billion Total

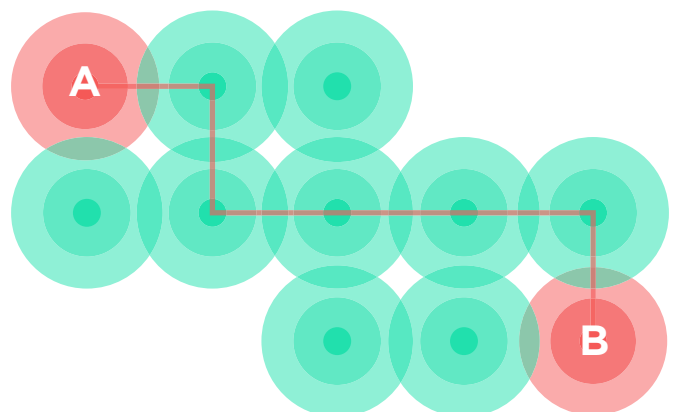

COST STRUCTURE

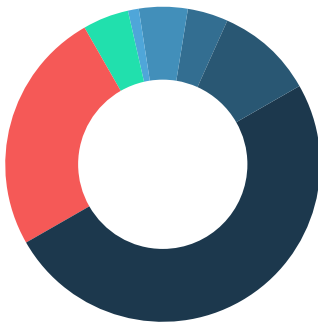

- Pay to use any of the revenue streams
- Get paid to use the app
- Value in transacting

REVENUE STREAMS

- MeshAD
- MeshDev-Platform
- MeshEX
- MeshAID Disaster Redundancy networks
- Mesh Token-Transactional

- 50 % Mining
- 25% Future Development & Mainstream Adoption
- 4.9% BlockMesh Founders
- 1% Pre ICO
- 5% Reward Air Drop
- 4.1% Service Providers
- 10% ICO

MEASUREABLE DIFFERENCE VS. COMPETITION

- Free to use – no data required from network providers
- Earn Mesh coins by supporting the network
- Coins are transferable
- Coins are liquid (Bancor)
- Estimated 30% Reward for holding BlockMesh with in first year.

SPECIFIC UNFAIR ADVANTAGE

- Proprietary technology
- Algorithms
- Uses existing phones – no infrastructure required (e.g. cell phone towers or satellites)

CUSTOMER SEGMENTS

- Smart phone holders
- Communities with high data costs
- Communities with low coverage
- Disaster areas
- Rural

SALES AND DISTRIBUTION CHANNELS

- Referral system: invite someone and earn coins if they sign up and when you start to “mine”
